

OBJECTIVE

“Enthusiastic software developer seeking a role as a MERN stack or React developer to leverage strong technical skills in JavaScript, React, and backend development. Eager to contribute to innovative projects in a collaborative environment and grow as a professional through hands-on experience.”

EDUCATION

JC Bose University of Science and Technology, YMCA, Haryana, India

Aravali College of Engineering and Management

Bachelor of Technology - Computer Science and Engineering (Aug 2019–July 2023)

Courses: Data Structures, Algorithms, OOPS, Databases, Operating Systems

TECHNICAL SKILLS

Frontend Technologies: React.js, Redux, Redux-Saga, HTML, CSS, Bootstrap, Material UI

Backend Technologies: Node.js, Express.js, Socket.IO, CORS

Programming Languages: JavaScript, TypeScript, Java

Databases & Tools: MongoDB (NoSQL), MySQL, SQL Server (RDBMS)

Tools & Utilities: Nodemon, ESLint, Prettier, Git & GitHub, VS Code, Apache Tomcat

Deployment & DevOps: Netlify, GitHub Pages

Soft Skills: Team Collaboration, Leadership, Public Speaking, Communication

EXPERIENCE

SoftSynth Software Solution Pvt. Ltd.

Faridabad, Haryana

Full Stack Developer (Trainee + Intern) - July 2022 - June 2023

- Completed 6 months of structured training followed by a 6-month internship within the same organization
- Collaborated on full-stack web applications, leveraging both frontend and backend technologies.
- Contributed to multiple client-facing projects using J2EE and modern web stacks.

PROJECTS

Career-Forge  career-forge.co.uk

- Developed a consultancy website for a UK client; delivered ahead of schedule.
- Used Express.js, HTML, CSS, and Bootstrap to build a responsive, cross-browser compatible UI.
- Improved user engagement through optimized design and intuitive navigation.

E-Commerce Platform

- Building a full-stack e-commerce platform using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implementing admin and user dashboards with features like product management, order tracking, and secure checkout.
- Integrating Redux for state management and REST APIs for scalable backend services.

Gmail Clone (Mailing Web App)

- Developed mailing app with user-friendly interface to enhance UX.
- Utilized J2EE, JDBC, MVC, MySQL, JavaScript, HTML, and Bootstrap for full-stack implementation.
- Implemented secure mail features with category filtering, reducing user errors.
